GENERAL SECTION

TO THE HONOURABLE DR. J. DONOVAN ROSS,
MINISTER OF HEALTH,

Administration Building, Edmonton, Alberta.

SIR:

I have the honour to submit herewith the Annual Report of the Hospitals Division of the Department of Public Health for the year 1961.

I have the honour to be, Sir,

Your obedient Servant,

J. D. CAMPBELL, M.Com., F.C.A., R.I.A.,

Director of Hospitals Division.

INTRODUCTION

(1) ADMINISTRATIVE RESPONSIBILITY

The Alberta Hospitalization Benefits Plan has been in operation since April 1, 1958 when it replaced the Provincial Municipal Hospitalization Plan which dated back to July 1, 1950.

Administration of the Alberta Hospitalization Benefits Plan is the responsibility of the Hospitals Division of the Department of Public Health. The Director of the Hospitals Division is directly responsible to the Minister of Health for the operation of the Plan and is authorized to negotiate and sign agreements, on behalf of the Minister, with federal authorities under The Hospital Insurance and Diagnostic Services Act (Canada). J. D. Campbell, M.Com., F.C.A., R.I.A., who was Director of the Hospitals Division at the commencement of the Plan in 1958, returned to act as Director on October 1, 1961, following the resignation of J. D. Wallace, M.D., who is now executive director of the University of Alberta Hospital, Edmonton.

The duties and powers of the Hospitals Division include the approval of location and construction of hospitals; the training of hospital personnel to the extent that training costs are treated as hospital costs; the determination, approval and maintenance of adequate standards of services rendered within a hospital; the provision of consulting services involving the operation of a hospital through and in association with the Associated Hospitals of Alberta; the inspection and supervision of hospitals; the paying of hospitals for insured services and the approval of rates determined; the approval of all hospitals and nursing training schools; the administration and enforcement of the Alberta Hospitals Act and the regulations made by the Lieutenant Governor-in-Council under this Act and the administration of the Agreement with the Government of Canada respecting contributions under the Hospital Insurance and Diagnostic Services Act.

In setting up the joint Federal Provincial Hospitalization Plan in Alberta an attempt was made to eliminate all unnecessary detail involved in administration but at the same time to retain those aspects which were considered to be essential for the effective economical administration of the Plan. The steps which were taken have resulted in reasonably satisfactory relationships both with the hospitals operating under the Plan as well as with federal authorities. At the same time, control of a general nature has been established supporting the trustee responsibility of the Division involving disbursements of public funds. The cost of administration is now being maintained at what is considered to be a very reasonable level at approximately .4% of the total expenditures of the Hospitals Division without consideration of the actual capital outlays involved in respect to construction which is also administered by the Hospitals Division. Table 1 sets out the experience in this regard over the past four fiscal years.

TABLE 1
HOSPITALS DIVISION — COST OF ADMINISTRATION
FISCAL YEARS ENDED MARCH 31st

	1959	1960	1961	1962

Cost of Administration per Eligible Resident10	.10	.13	.15

(2) COVERAGE

Any person who is legally entitled to reside in Canada and who makes his home and is ordinarily present in the Province is entitled to benefits provided by the Alberta Hospitalization Benefits Plan.

A minority of Alberta residents are excluded from benefits under the Plan. These are residents who are entitled to receive hospital benefits from the Government of Canada or from the Workmen's Compensation Board, and residents who are declared as not being in need of hospital in-patient care in a hospital. Tourists, transients and visitors to the province are excluded.

A resident of Alberta moving to another Province is covered under the Alberta Plan for the period it normally takes to become eligible for insured benefits in that Province.

Normally persons becoming residents of Alberta after residing in another Province are covered by the Alberta Plan upon the expiry of the coverage they bring with them.

Alberta residents who transfer their residence to another country are covered by the Alberta Plan until they reach the point of exit from Canada.

The Alberta Hospitalization Benefits Plan provides hospital benefits to the residents of Alberta outside of the Province.

The hospital benefits provided under the Alberta Hospitalization Benefits Plan include bed accommodation at a standard ward level; meals; necessary nursing service; laboratory, radiological and other diagnostic procedures; drugs, biologicals and preparations when administered in a hospital; use of operating room, case room and anaesthetic facilities, including necessary equipment and supplies; routine surgical supplies and radiotherapy and physiotherapy facilities, where available.

Drugs, biologicals and related preparations are covered under the plan when the supplies or drugs are considered necessary for the treatment of the patient while in hospital and are not intended for use after discharge from hospital.

The patient bears the responsibility for the differential charge between standard ward hospitalization rate and private or semi-private accommodation rate when private or semi-private accommodation is provided at the patient's request.

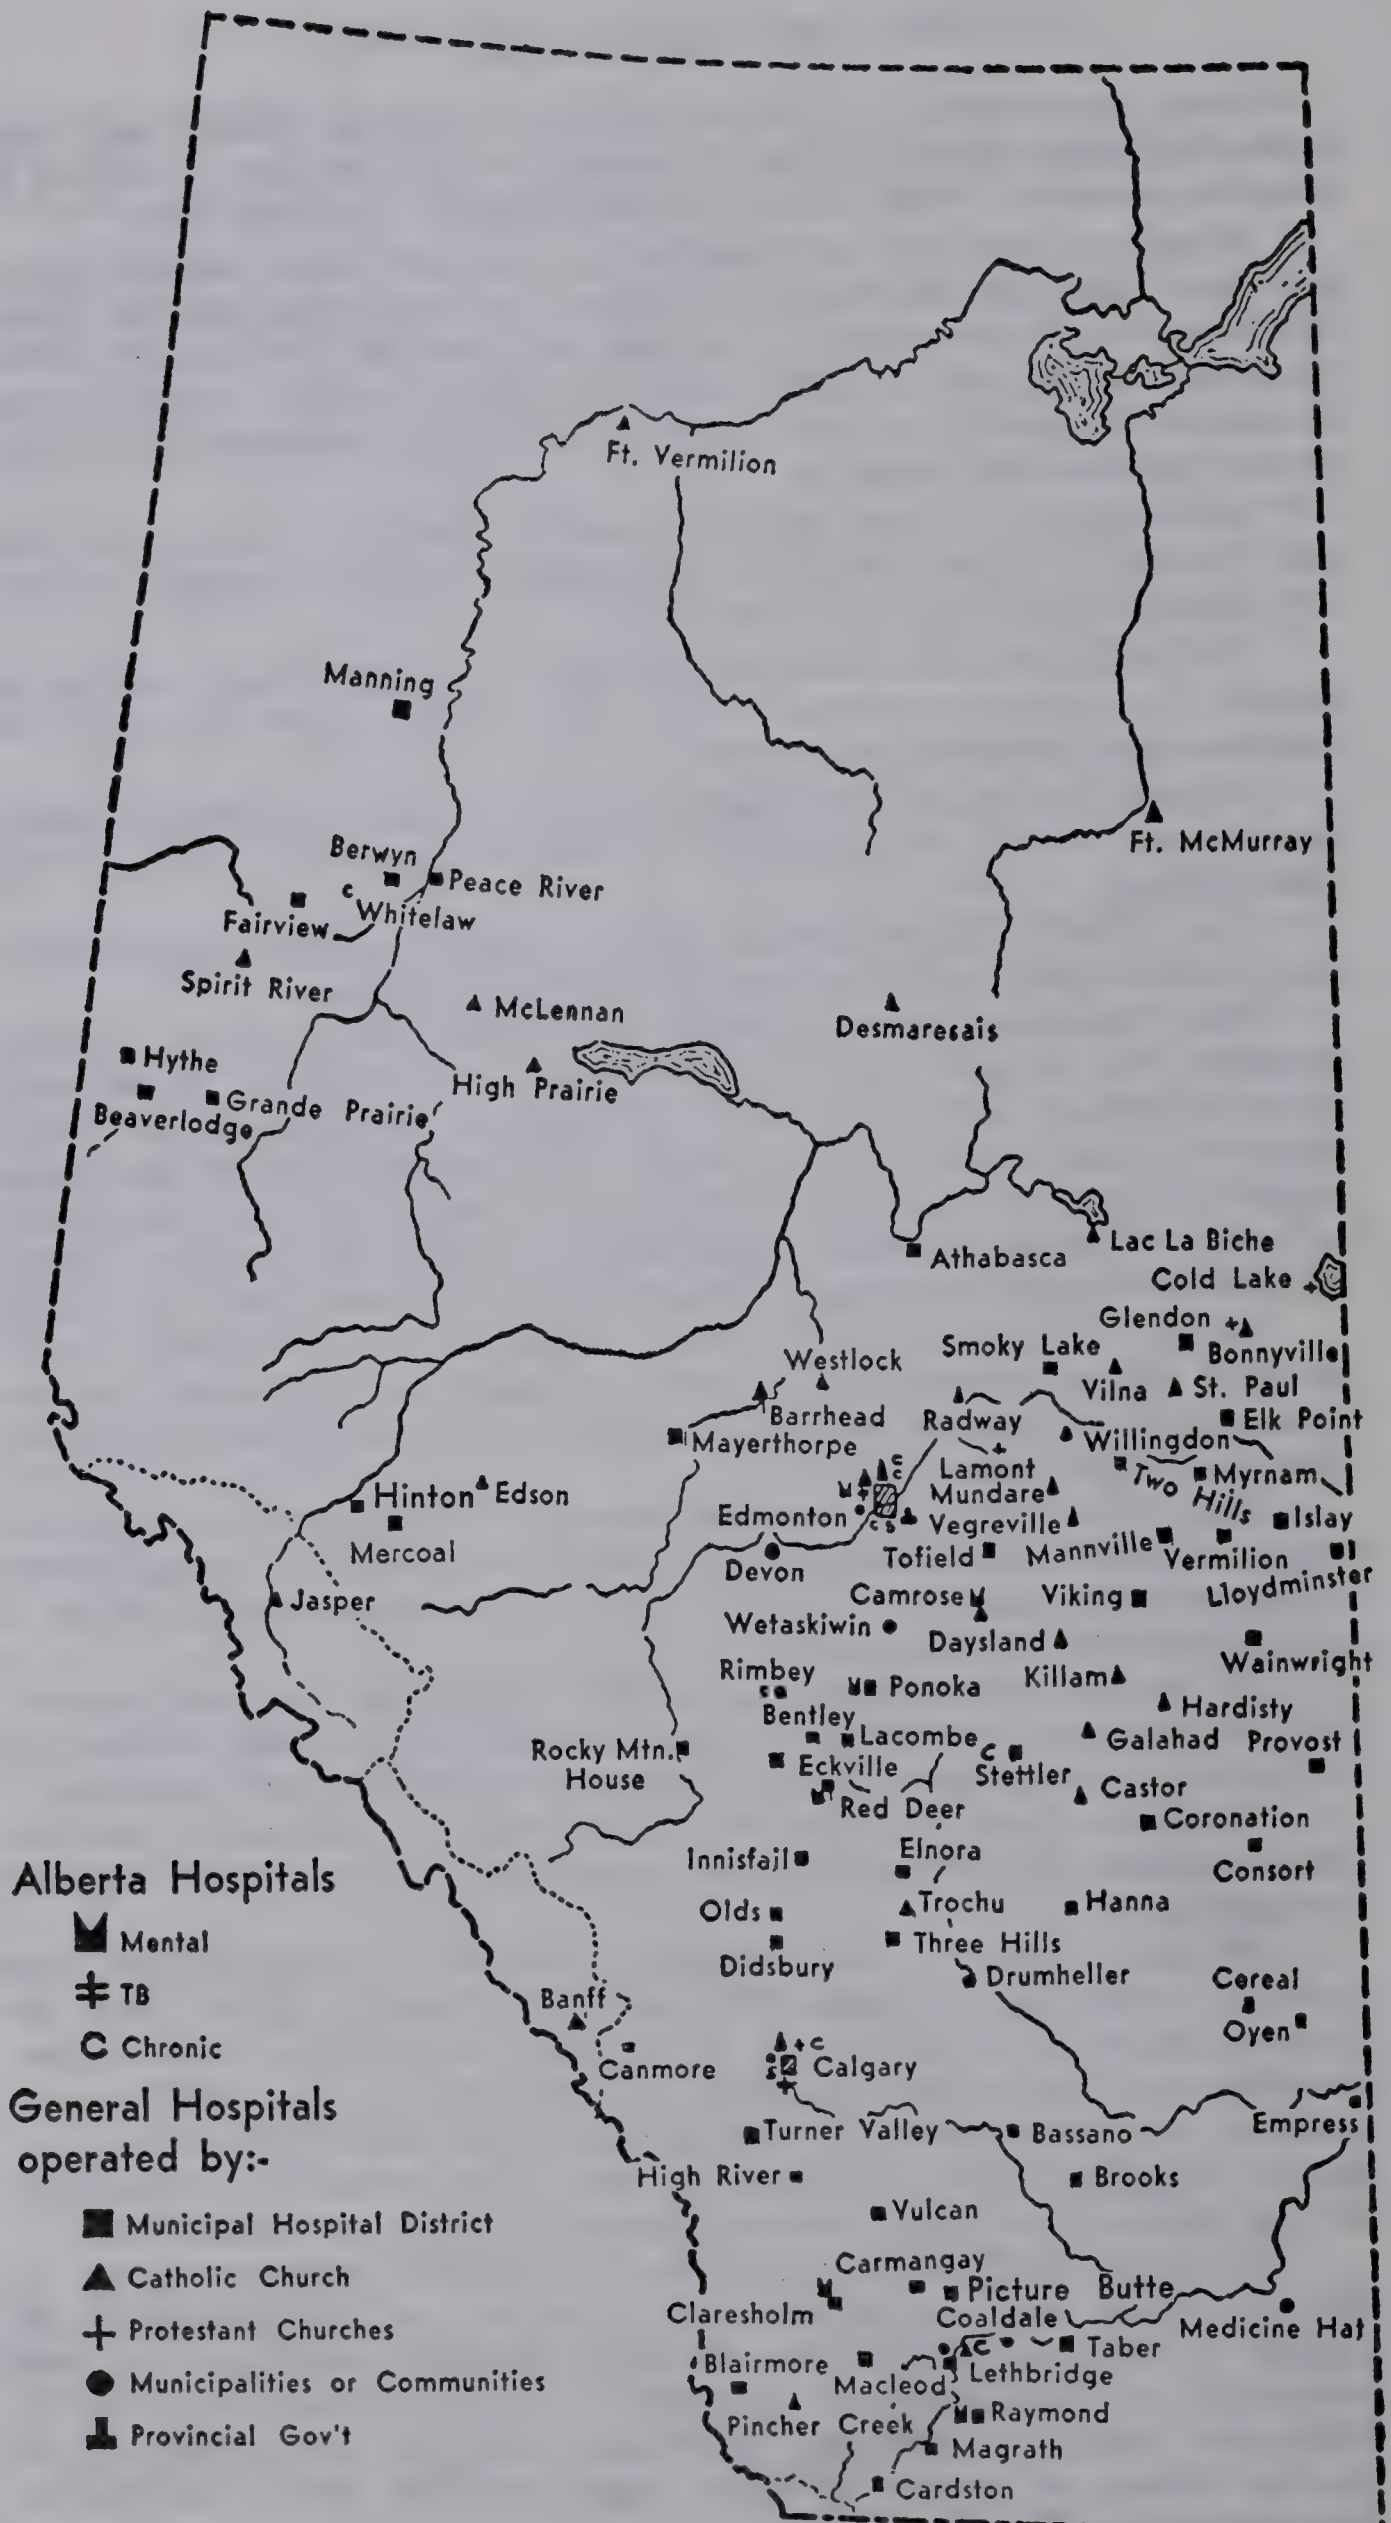

All patients excepting social welfare recipients, receiving out-patient services are responsible for the total charge for such services on the basis of a schedule of rates determined by the Hospitals Division.

There are no limitations on the length of stay for which the patient is eligible for insured services, provided that the patient requires hospital care.

Effective April 1, 1959, auxiliary (chronic) hospitalization was included under the Alberta Hospitalization Benefits Plan. The individual patient is admitted to the auxiliary hospital on the recommendation of his or her physician providing he or she qualifies as a resident and is approved by the medical assessment committee as a patient requiring auxiliary hospital care. The patient is responsible for the payment of a co-insurance charge of \$1.50 per patient day.

Although the freedom of choice of hospital has been given to the individual, it is recognized that there are certain restrictions in regard to distance, availability of beds, attendant waiting lists, and availability of the doctor of the patient's choice which, to a degree, limits the extent to which the individual is able to take advantage of the free choice of hospital which is made available under the Alberta Hospitalization Benefits Plan.

HOSPITALS DIVISION

(3) HOSPITALS OPERATING UNDER THE PLAN

There are basically five types of institutions which operate under the Alberta Hospitalization Benefits Plan.

Approved General Hospitals are general treatment hospitals in Alberta, and the Lloydminster Hospital (situated in Saskatchewan but partly owned by Alberta) which primarily provide "short-term" hospitalization. On December 31, 1961, there were 103 approved general hospitals in operation whose total rated capacity was 7,681 beds and 1,506 bassinets.

Approved Auxiliary Hospitals are institutions for patients who require hospital care but not as intensive care as would be provided by approved general hospitals. Auxiliary Hospital care is provided for the treatment of the chronically ill.

The primary objective of the Auxiliary hospital program is to provide hospital care, thus the Auxiliary hospital is a care, treatment and discharge centre. The aim is to provide service to the maximum number of patients in the province requiring auxiliary hospital care and to prevent the institution from becoming a custodial care unit. To follow out this aim the care given in the auxiliary hospital will involve.

- (a) The treatment of patients and their rehabilitation to the extent that the patients can return either temporarily or permanently to the community.
- (b) The treatment of patients who require hospital care for an extended period of time. The patients in this area will have little or no prospects for rehabilitation but will require the skilled nursing and medical care which is available only in a hospital. The treatment given in this situation will normally prevent or delay further deterioration of the patient's condition.

On December 31, 1961, there were 13 approved auxiliary hospitals in operation with a total rated capacity of 1,039 beds.

Contract Hospitals are privately owned hospitals which are not approved general hospitals but which are under contract with the Hospitals Division to provide hospital care that is similar to that of general hospitals. At December 31, 1961, there were two contract hospitals in operation under the Plan, the Beulah Home, Edmonton, and St. Martin's Hospital, Desmarais, representing a total rated capacity of 20 beds and 4 bassinets.

Contract Nursing Homes are proprietary institutions temporarily under contract with the Hospitals Division to provide hospital care for persons who would be eligible for admission to an auxiliary hospital. These temporary contracts were made because of the shortage of approved auxiliary hospital accommodation.

On December 31, 1961, there were 40 contract nursing homes with a bed capacity of 1,210. On 31 December, 1961, 11 nursing home contracts of the above were terminated in the Calgary area involving a bed capacity of 159 beds.

HOSPITALS DIVISION

Federal Hospitals are hospitals operated by federal agencies such as the Department of National Health and Welfare, the Department of Veterans Affairs and the Department of National Defence. Federal Hospitals are reimbursed by the Hospitals Division for such of their in-patients as are eligible for insured services under the Alberta Hospitalization Benefits Plan.

Tables 2 and 3 set out the statistical data in respect to the hospitals operating under the Alberta Hospitalization Benefits Plan.

(4) FINANCING OF THE PLAN

The Alberta Hospitalization Benefits Plan involves a sharing of hospital costs by the individual patient or his agent, the municipalities, the Provincial Government, and the Federal Government. The province has partially utilized the federal contributions, which began in 1958, in relieving the resident and the municipality of a portion of the burden of hospitalization costs. The following table presents a comparison of the relative contributions by the participants in the hospitalization plan in Alberta both before and after the introduction of federal participation.

TABLE 4
PROVINCE OF ALBERTA
COST OF HOSPITALIZATION AND IMPOST BORNE BY PARTICIPANTS

Participant	1957		1959		1960		1961	
	Amount (\$000)	%	Amount (\$000)	%	Amount (\$000)	%	Amount (\$000)	%
Patient	\$ 6,386	23.63	\$ 3,171	8.01	\$ 3,664	7.86	\$ 3,224	6.23

Total	\$27,002	100.00	\$39,587	100.00	\$46,538	100.00	\$51,765	100.00

Payments to Hospitals by Patients or their Agents—Co-insurance

The patient's direct share of the cost of hospitalization has remained stable from the inception of the plan.

An eligible in-patient who is admitted to an approved hospital or a federal hospital is charged a daily fee, known as a co-insurance payment, at a rate depending upon the size of the hospital. A non-eligible in-patient is charged a flat rate set by regulation.

The daily rates charged to in-patients in approved hospitals as at December 31, 1961, are shown in Table 5.

After 30 days of hospitalization a newborn infant is classified as a child and thereafter is charged the rates applicable to adults and children.

TABLE 5

RATES PER PATIENT DAY PAID TO VARIOUS TYPES OF HOSPITALS PARTICIPATING IN THE ALBERTA HOSPITALIZATION BENEFITS PLAN AND DAILY RATES CHARGED TO IN-PATIENTS AT STANDARD WARD LEVEL AS AT DECEMBER 31, 1961

* Basic overall monthly payments made

** Information not available

Payments by Municipalities

The municipalities make contributions to the provincial government toward the costs of hospitalization under the Alberta Hospitalization Benefits Plan at the rate of a levy of 4 mills based on an equalized assessment.

In addition, the municipalities as well as the owners of the municipal and civic and voluntary hospitals are required to cover any unapproved operating costs as determined by the Director of the Hospitals Division in the case of each approved hospital for which they are responsible.

Payments to Hospitals by the Province

1. Operating Cost of Approved General and Auxiliary Hospitals.

The Province accepts the residual share of the approved operating cost for hospitalization which is shared with the Federal Government.

The Province pays a basic monthly payment representing an estimate of one-twelfth of the annual residual approved operating costs of the hospital, less the amounts which are charged by that hospital to non-eligible patients.

Each hospital is dealt with as a separate entity. The costs of providing insured services by the hospital for the previous calendar year represents the basis for payment in the current year. Semi-annual interim adjustment payments are made in July and December to compensate for changes in general cost levels.

As in former years the Department of Public Health paid the co-insurance charges for resident patients who come under the category of poliomyelitis, social welfare, arthritis, cancer (for a diagnostic period of up to seven days), and maternity and newborn patients for a period of up to twelve days.

During the calendar year 1961 the provincial payments for the operating costs of approved hospitals amounted to \$37,888,655.

2. Capital Costs—Approved General and Auxiliary Hospitals.

The Province of Alberta makes annual repayment of principal and interest on (1) debentures and loans outstanding as at January 1, 1959 and on (2) debentures and loans contracted after January 1, 1959, arising from approved construction or major renovation of approved hospitals.

The cost of the major equipment is shared by the Provincial and Federal Governments, while the cost of original issue of minor equipment for new construction is paid for by the Provincial Government.

The cost of unapproved equipment and/or excess costs of approved equipment is met by the owners of the hospital.

During the calendar year 1961 the provincial payments for capital costs of approved hospitals amounted to \$9,222,075.

3. Payments to other Hospitals.

Contract hospitals, contract nursing homes and federal hospitals are reimbursed on a patient day basis.

During the calendar year 1961 the provincial payments to other hospitals amounted to \$3,456,808.

4. Other payments.

Out-of-province benefits and home confinement payments were made by the province during the calendar year 1961 in amounts of \$373,359 and \$11,720 respectively.

Payments by Federal Government

The grant by the Federal Government towards meeting the cost of the Alberta Hospitalization Benefits Plan is based partly on the average level of the cost of in-patient hospitalization excluding capital costs in Canada and partly on the cost of in-patient hospitalization reduced by the amounts charged to patients for co-insurance in Alberta.

Third Party Liability

Where a person has received hospitalization benefits under Alberta's Hospitalization Benefits Plan and is legally entitled to recover the cost of hospitalization from some other person by way of damages for injury caused by negligence or other wrongful act, the Province is entitled to recover all or part of their costs for hospitalization provided.

During 1961 the net amount recovered was \$140,948.06, involving 587 patients hospitalized during 1958, 1959, 1960 and 1961.

GENERAL SECTION

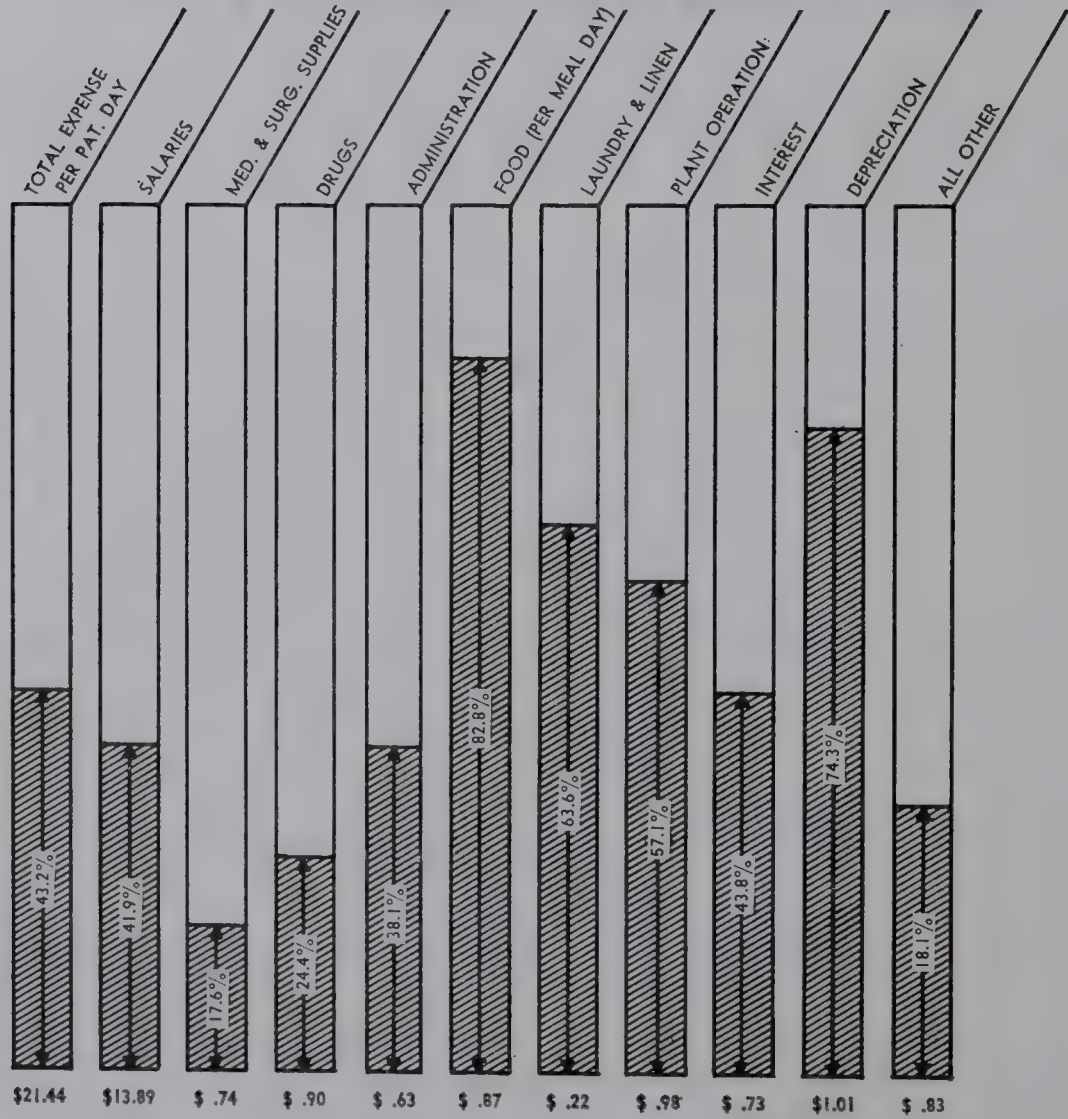

(5) GENERAL HOSPITALS VS. AUXILIARY HOSPITALS

A comparison of per patient day costs in Table 6 and the comparison of work hours in Table 7 for the two types of hospitals indicates the economic advantages of providing auxiliary hospitals.

(6) INFORMATION ON MORBIDITY AND SURGICAL OPERATIONS

The year 1961 saw an important forward step taken by the Hospitals Division in that information was obtained and collated regarding the prevalence of disease and surgical operations of patients hospitalized in Alberta. The information on diseases has been coded according to the International Classification of Diseases and the operations according to the U.S. Operations Code.

Table 8 lists the 15 leading causes of hospitalization excluding economic considerations in general hospitals.

Table 9 lists the 20 most common primary operative procedures performed in general hospitals in 1961.

A detailed list of primary diagnosis is given in Table 58, in the appendix for general hospitals, auxiliary hospitals and provincial responsibility patients in federal hospitals. Also given in Table 59 in the appendix is a breakdown of primary diagnosis, by length of stay, of long-term patients still in hospital at December 31st, 1961, in approved auxiliary hospitals and contract nursing homes.

	Total	82,736	753,304	9.1	100.0%

(7) CARE OF SOCIAL SERVICE RECIPIENTS

There were 20,947 social service recipients separated from Alberta General Hospitals in 1961, most of whom (78.6%) were Old Age Pensioners. The remainder were recipients of mothers allowances (5.7%), blind pensions (1.6%), widows allowances (1.3%) and disability pension allowances (12.8%). They stayed in hospital for a total of 336,175 days.

The number of social service recipients hospitalized decreased by 383 (1.8%) patients from the experience in 1960 but their days increased by 4,308 (1.3%) due to the slight increase in average length of stay which was 15.6 in 1960 and 16.0 in 1961.

(8) OUT-OF-PROVINCE HOSPITALIZATION

The number of residents claiming benefits in out-of-province hospitals and the amounts paid in 1961 showed an increase over the previous years experience. Table 10 provides comparative information for the two years. The increase can be partly attributed to the removal of the regulation, requiring the approval for referral for treatment outside of the province.

TABLE 10

(9) HOSPITAL CONSTRUCTION

During 1961 a total of 175 new active treatment beds, 52 bassinets and 105 nurses' residence beds were completed, as well as 336 auxiliary hospital beds. Table 11 lists the projects completed in 1961.

Of the 511 hospital beds 414 represented additional beds and 97 represented replacements.

In addition to the above, as at December 31, 1961, there were 1,501 active treatment beds, 116 bassinets, 91 nurses' residence beds and 318 auxiliary hospital beds under construction.

Of the 1,819 hospital beds under construction 1,486 represented additional beds and 333 represented replacements.

(10) PAYMENTS MADE BY HOSPITALS DIVISION

Total expenditure by the Province of Alberta other than for new construction through the Hospitals Division for various aspects of the hospitalization program during the calendar year 1961 amounted to \$48,267,954. This figure excludes expenditures on mental, tuberculosis and cancer hospitalization.

The estimated recovery from the Federal Government for the calendar year 1961 in respect to the above expenditures will be \$21,800,000.

(11) ADMINISTRATION COSTS OF HOSPITALS DIVISION
—Detailed

Total administrative costs of the Hospitals Division during the fiscal year ended March 31, 1962 was \$202,930.41. The major portion of administrative expenses were for salaries which amounted to \$168,963.97 and comprised 83.3% of total cost. A detailed breakdown of the expenses are given in Table 13.

APPROVED GENERAL HOSPITALS

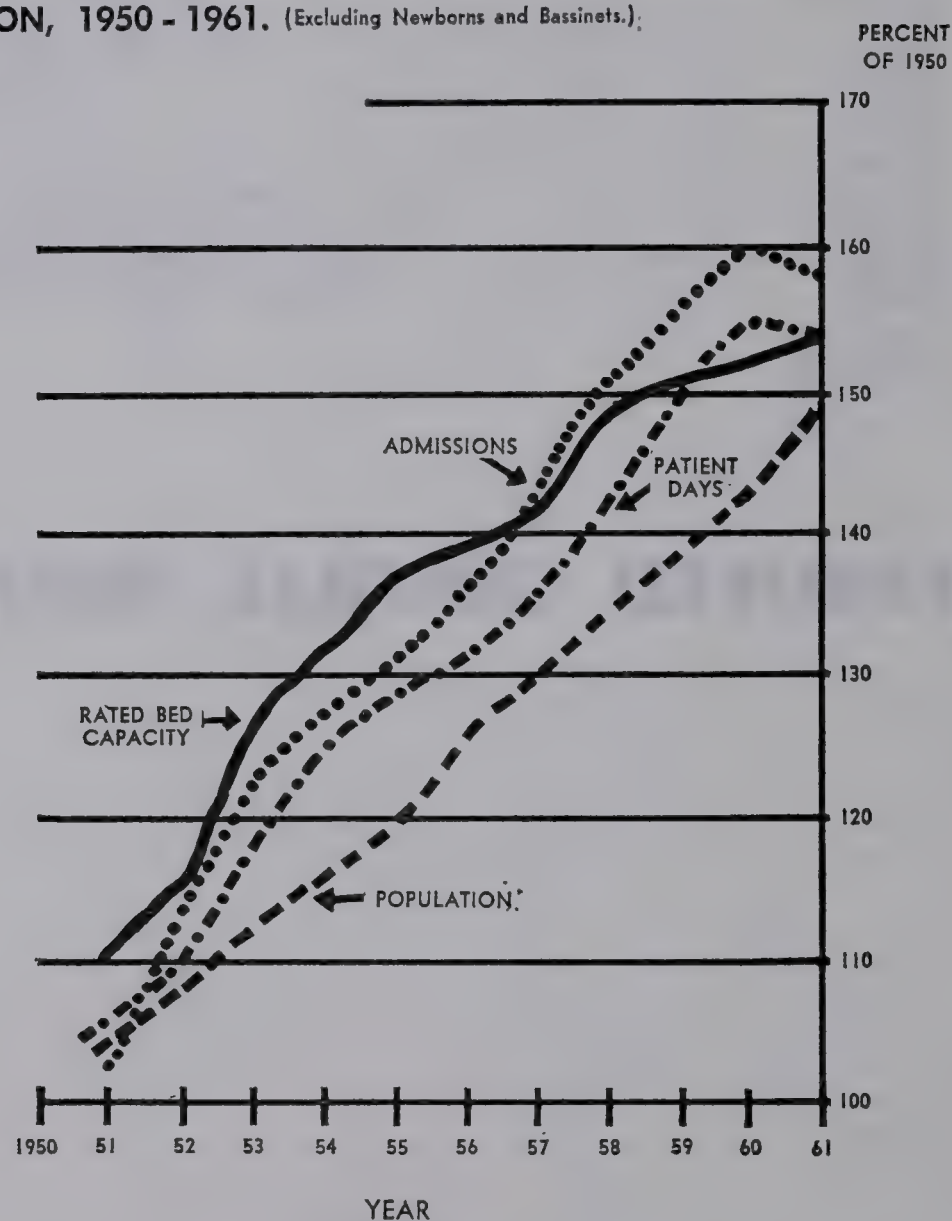

APPROVED GENERAL HOSPITALS

Within the terms of Hospital Regulations set by the Department of Public Health the level of services within individual hospitals has been established according to the wishes of the community it serves, the policy of the owners of the hospital and the level of medical services available in the community governed by the existing economics of the situation.

Information in this section is derived from the Annual Return of Hospitals, Part 1, Facilities and Services, which is completed annually by all hospitals.

DIAGRAM 4

CHANGES IN RATED BED CAPACITY, ADMISSIONS, AND PATIENT DAYS OF GENERAL HOSPITALS IN RELATION TO POPULATION, 1950 - 1961. (Excluding Newborns and Bassinets.)

(12) RATED CAPACITY, BEDS SET UP AND OCCUPANCY

Rated Bed Capacity and Beds Set Up

The rated bed capacity of a hospital represents the number of beds that a hospital is designed to accommodate on the basis of established standards of floor space area and approved by the Minister of Health. Number of beds set up shows the number of beds actually set up for the accommodation of in-patients as at a specified date. In the present annual report the specified date is December 31, 1961.

Alberta's hospital experience over the past twelve years, 1950-1961 inclusive, shows that the number of beds actually set up for use at December 31 has always exceeded the rated bed capacity of the general hospitals.

At December 31, 1961, there were 393 more beds and cribs and 54 more bassinets set up for use in the general hospitals than the rated capacity of these hospitals. A study of Table 14 shows that the percentage of beds set up to rated capacity has increased continuously from 1956 to 1960, but has dropped from 1960 to 1961.

In 1961, 68 hospitals reported more beds set up at December 31, 1961 than their rated capacity, but only 7 hospitals as against 11 hospitals in 1960 had an occupancy of 100% or more of rated bed capacity. On the other hand, five hospitals reported fewer beds set up than their rated capacity.

Type of Unit

Of the 8,074 general beds and cribs set up as at December 31, 1961, a total of 4,947 (61.3%) were medical and surgical beds. There were 254 more medical and surgical beds set up than the rated capacity of the general hospitals in that type of beds; this increase accounted for 64.6% of the total difference between the rated bed capacity and the beds set up in all categories of beds in general hospitals in 1961.

Table 15 gives a breakdown of the rated bed capacity of Alberta general hospitals and beds set up as at December 31, 1961, by type of unit and size of hospital.

Beds per 1,000 Population

In Alberta as at December 31, 1961, there were 5.8 rated active treatment beds (or 6.1 beds set up) for every 1,000 people. If the rated beds of the Federal Hospitals, the rated beds of the Contract Hospitals and the rated chronic beds of the Auxiliary Hospitals and Contract Nursing Homes are included, the ratio of rated beds per 1,000 population is actually 8.25.

Compared with 1960, the rated bed capacity of Alberta approved general hospitals in 1961 showed a slight decrease in relation to population growth. This is reflected in the decrease of rated active treatment beds per 1,000 population from 5.9 beds in 1960 to 5.8 beds in 1961 but nevertheless there was a decrease of patients per rated bed from 34.2 in 1960 to 33.6 in 1961, and a drop in percentage occupancy from 81.8 to 81.2. This situation is accounted for by increased absorption of long-term patients by the auxiliary hospital and contract nursing home programmes, even though the federal hospitals are absorbing a smaller percentage of total patients. Percentage of the total patient days in 1961 absorbed by the different types of hospitals (with 1960 percentages given in brackets) are as follows: General Hospitals 70.1% (71.8%); Auxiliary Hospitals 9.3% (8.7%); Contract Hospitals .1% (.1%); Federal Hospitals 8.6% (9.2%) and Contract Nursing Homes 11.9% (10.2%). In subsequent years this trend is expected to continue as the long-term hospital programme develops.

Table 16 shows the ratio of general hospital beds per 1,000 population and their percentage occupancy for the past 12 years, 1950-1961.

(13) MOVEMENT OF PATIENTS, PATIENT DAYS,
LENGTH OF STAY

There was a decrease in adult and child patient movement and hospitalization from 1960 to 1961 in general hospitals. Number of adults and children hospitalized in 1961 was 258,259 which is 881 less than in 1960. Days of care for adults and children decreased by 7,672 to 2,260,026 in 1961.

Newborns hospitalized in 1961 remained almost the same as in 1960 at 38,516 which is an increase of 7 but newborn days of care decreased to 270,118, lower by 2,016 days. Newborn patients who remain in hospital are discharged at 30 days of age and readmitted as children.

Table 18 indicates that 1961 evidenced a substantial drop in rates of admissions, patients under care and days of care per thousand population as well as a decrease in average length of stay. This explains the decrease in total admissions and patient days at general hospitals even though the population increased by almost 49,000 from 1960 to 1961. More diversion of long term patients to auxiliary hospitals may tend to continue this trend in the immediate period ahead, and explains a portion of the current decrease in general hospitals. It should be noted, however, that while the activity of auxiliary hospitals and contract nursing homes has increased the total days of care per 1,000 population for all types of hospitals in 1961 stood at 2,418 which is a decrease from the figure of 2,461 in 1960.

TABLE 18
HOSPITALIZATION CASES, LENGTH OF STAY, ADMISSIONS, SEPARATIONS AND THEIR RELATED DAYS OF CARE IN GENERAL HOSPITALS PER 1,000 POPULATION 1950-1961

Routine Chest Proportion	14.5%	13.8%	15.6%

(16) LABORATORY SERVICES

The volume of laboratory work performed in general hospitals in 1961 amounted to 5,582,889 units of which 5,164,970 (92.5%) were for in-patients and 310,912 (5.6%) were for out-patients. Of the total work done in the hospital some 107,007 (1.9%) were referred in.

The volume of laboratory work reported by general hospitals for 1961 increased by 15.2% for in-patients and by 31.8% for out-patients over 1960. The volume of laboratory work referred in to hospital laboratories increased by 64.2%.

Comparative data for 1959, 1960 and 1961 is given in Table 21.

TABLE 21

Units Per In-Patient	19.4	20.6	24.2
Units Per In-Patient Day	2.2	2.3	2.7

(17) SURGICAL SERVICES

There were 121,441 operations carried out in the general hospitals of Alberta during 1961, of which 80.6% were for in-patients and 19.4% were for out-patients. These figures in Table 21 include operations carried out in the emergency unit of the hospital during 1960 and 1961 while the figures for 1959 did not include them.

Table 22 provides summary data on surgical services in Alberta general hospitals during 1959, 1960 and 1961.

TABLE 22
SURGICAL SERVICES IN GENERAL HOSPITALS

Item	1959	1960	1961

(18) OBSTETRICAL SERVICES

During 1961 there was an increase of 134 deliveries over 1960. Of every 1,000 deliveries, an average of 27.4 were Caesarean sections.

Table 23 provides data and rates on obstetrical services in Alberta general hospitals during 1959, 1960 and 1961.

TABLE 23
OBSTETRICAL SERVICES IN GENERAL HOSPITALS

Item	1959	1960	1961

(20) PERSONNEL AND PAID HOURS OF WORK

Full-time and Part-time Staff as at December 31, 1961

As at December 31, 1961 there were 12,940 persons employed at the general hospitals, comprising of 12,087 full-time and 853 part-time, as compared to 11,658 full-time and 790 part-time employees in 1960. This is an increase of 429 (3.7%) full-time and 63 (8.0%) part-time personnel over the same date in 1960. Based on full-time employment (total employee hours divided by 2,080 hours) there were 12,297 persons employed during 1961.

For every 100 rated beds and cribs in general hospitals, there were 158.2 full-time employees as at December 31, 1961, of which 9.2 were engaged in administration, 2.4 were members of the medical staff, 9.9 were other professional or technical personnel, 91.0 were nursing staff (excluding Registered Nurses responsible for hospital administration), and 45.7 were other personnel. Table 25 is a comparison of numbers of full-time staff per 100 rated beds in 1961 with 1960 experience.

TABLE 25
NUMBERS OF FULL-TIME STAFF PER 100 RATED BEDS AND CRIBS
IN GENERAL HOSPITALS

STAFF	1960	1961
Administration	8.6	9.2

*Excluding Lloydminster Hospital

Paid Hours of Work of All Staff

Total hours of work includes paid holidays and other paid leave and in the case of student nurses both duty and classroom time are included.

Total hours of work in general hospitals in 1961 amounted to 25,578,732 as compared to 24,804,521 in 1960, an increase of 774,211 hours or 3.1%.

For every patient day there were 9.9 hours of work (excluding hours spent in the organized emergency and out-patient departments).

Adults and children patients received a total of 10,116,438 hours of direct nursing care, of which 37.5% were from graduate nurses, 20.4% from student nurses, 5.1% from orderlies, 35.4% from other nursing staff and 1.6% from other nursing personnel.

On the average, every adult and child in-patient received 4.5 hours of direct nursing care daily.

Direct nursing care for newborns amounted to 793,362 hours in 1961, or an average of 2.9 hours of direct care every day.

The greater portion (44.0%) of the total hours worked by hospital employees in 1961 were spent on direct care of patients (including organized emergency and out-patient unit). Slightly less than one-third (32.8%) of the hours were spent on general services.

The distribution of the total hours of work by category of staff and department in 1961 were as shown in Table 27.

(22) PLANT ASSETS

Summary analysis of value and depreciation of plant assets during 1961 is given in Table 30.

TABLE 30
ANALYSIS OF VALUE AND DEPRECIATION OF PLANT ASSETS, 1961

ITEM	Buildings and Building Service Equipment	Major and Other Equipment	Total
Value of Plant Assets:	\$	\$	\$
Balance at January, 1961	78,476,724	14,833,952	93,310,676
Assets added in 1961	5,860,148	1,778,384	7,638,532
Sub Total	84,336,872	16,612,336	100,949,208
Less Assets Retired in 1961	379,808	112,416	492,224
Balance at December 31, 1961	83,957,064	16,499,920	100,456,984
Depreciation of Plant Assets:			
Balance at January 1, 1961	11,611,013	5,033,853	16,644,866
Depreciation Provided During 1961	1,523,407	773,480	2,296,887
Sub Total	13,134,420	5,807,333	18,941,753
Less: Accumulated Depreciation on Assets Retired	97,801	88,305	186,106
Balance at December 31, 1961	13,036,619	5,719,028	18,755,647
Net Book Value at December 31, 1961	70,920,445	10,780,892	81,701,337

(23) CAPITAL DEBT

Table 31 presents the outstanding capital debt of the approved general hospitals which has been recognized by the province for purposes of grants to hospital by the Province to be utilized in the repayment of outstanding debt.

TABLE 31
CAPITAL DEBT OF APPROVED GENERAL HOSPITALS

	1959	1960	1961
	\$	\$	\$
Balance at beginning of year	37,672,589	42,733,748	43,604,337
Additions during year	6,386,306	2,873,893	8,274,330
Sub Total	44,058,895	45,607,641	51,878,667
Retirements during year	1,325,147	2,003,304	2,154,045
Balance December 31st	42,733,748	43,604,337	49,724,622
